Abstract - The present study is aimed to examine the factors influencing the career advancement activities of women library professionals. It encompasses two universities ie, Kerala University and Mahatma Gandhi University. The population consists of women library professionals are permanently working in these Universities. About 78 permanent women library professionals are working in these Universities, Data is collected using a structured questionnaire. The questionnaire is distributed among 68 respondents out of which 62 were returned. The analysis is conducted by SPSS. Factors such as the professional, personal, the influence of professional associations, influence of ICT & social media, barriers faced on career progression were analyzed. The study revealed that professional factors & ICT were positively influenced the women library professionals career advancement activities. Gender discrimination is the main obstacle faced in career progression activities.

Keywords: Career Advancement, Women Library Professionals, Influencing Factors, Social Media, ICT

I. INTRODUCTION

The empowerment of women is a must for uplifting every field of life in the contemporary world. Especially career advancement is offering a new ladder to library and information science professionals in these modern libraries. Library professionals are willing to change and change themselves. So career advancement activities are needed for their upgrades in career life. Especially women library professionals act as multi-faceted for their professional and personal life. Career advancement is not easily accessed in the case of women library professionals. Various factors influence their career progression ie, their hard-working, knowledge and capacity development, academic development political and social relationship, associations, research and publication activities, family support, Information technology handling skill, social media usage, etc. are empowering the women librarians for their career progression activities. Many hurdles or obstacles faced on their way of career enrichment activities.

The problems that the women are facing on their workplace & chances of their promotion are remaining an oasis of the desert. If women have to come forward through their career, they have to face many problems both professionally & personally. A critical analysis is necessary about the growth of their career and factors influencing it. There must be a predominant consideration about the fact that women

librarians are getting through strength and support for their career growth and also it must be made sure about the obstacles & barriers facing on their professional path. Their technological knowledge, social media awareness, support of family members, the help of professional associations, educational qualifications, etc. must be seen by an observation about the progression in their career using the above-mentioned factors.

II. KERALA AND MAHATMA GANDHI UNIVERSITY LIBRARIES

The Kerala University Library (KUL), established in 1942, is the oldest and biggest university library in Kerala. It stocks over 3, 50, 000 books (growing at 5000 titles annually) and subscribes to nearly 500 journals/ periodicals/ magazines. It also offers digital information services such as UGC Infonet. Among its special collections, the Kerala Studies is a unique one. The special collections also include Women's Studies, Government Publications, General Biographies, UN and World Bank Publications, bound volumes of newspapers and journals and rare books. It is the only library in Kerala which serves as a depository of UN and World Bank publications. The library is currently in the process of digitizing its rare collections. The Kerala University Library is complemented with a number of specialized Department Libraries and also Campus Library at Karyavattom and Study Centre Libraries at Alappuzha, Kollam, and Pandalam. The University Institutes of Technology (UITs), University Teacher Education Centres (UTECS), and University College of Engineering (UCE) also have specialized libraries. (<https://www.kulib.in>) [1]. The Mahatma Gandhi University Library (MGUL) is situated in the main campus of the University at Aithirampuzha. The University Library was started in 1989. MGU Library and Information System consist of University Central Library, more than 30 libraries of the departments/schools and 4 study centers situated on different campuses. The Library is a member of the INFLIBNET Centre, Ahmedabad (INformation and LIBrary NETwork), an Inter-University Centre of the University Grants Commission. INFLIBNET Centre support has enabled to improve the quality and relevance of University Information services. The University Library is a fully automated system using the Open Source Software Koha for the In-house Management. It is also an

Institutional member of the DELNET (Developing Library Network, New Delhi). As a member of these networks, the library provides access to the resources of other major libraries in the nation to its users. The Mahatma Gandhi University was one of the first fifty Universities to come under the UGC-Infonet Programme. Through UGC-Infonet E-journals Consortium, the Library has access to more than 7500 e-journals and databases including SciFinder Scholar and Web of Science. The Library also has access to major online databases such as ProQuest Dissertations and Theses, Oxford Scholarship Online, Library and Information Science Abstracts (LISA), J-Gate Plus, etc and back volumes of the journals published by major publishers like Sage Online, Wiley International, Cambridge online and Springer online. The Mahatma Gandhi University (MGU) has won the State IT award during the year 2009 in the e-learning category for its University Online Theses Digital Library. With the launching of the Mahatma Gandhi University Online Theses Digital Library, it has become the first Indian University to adopt Open Access of its Doctoral Research theses to the academics worldwide through www.mgutheses.in. The University Library has a collection of 57,350 books, 2,500 e-books, 2,050 theses and 7,500 bound volumes of journals. In addition to this, the library subscribes 253 current Indian (169) and Foreign (84) journals, 4 Online Databases, and 4 Online Journal Archives. (<http://library.mgu.ac.in>) [2]. Kerala University and MG University stand top in the scoring rate of academic standard. Libraries play a prominent role in higher teaching, learning, and research. The service of library professionals is very accountable. A number of about one hundred and thirty library professionals working there both in University libraries and department libraries, most of them are women library professionals. If we go through the history of Kerala university library, it can be seen very clearly that most of the university librarians were females. The university librarians (in charge) of Kerala & Mahatma Gandhi University are still females.

III. OBJECTIVES OF THE STUDY

The major objectives of the study are,

1. To find out factors that attract in LIS profession.
2. To examine the influence of the associations in the career advancement activities.
3. To identify factors for career advancement to women library professionals.
4. To find out the ICT & Social media helps their career progression activities.
5. To find out the most influencing factors of career enrichment activities.
6. To know the obstacles faced by career progression activities.

IV. SCOPE & LIMITATIONS OF THE STUDY

This study helps to find out the career advancement activities, influencing factors, obstacles faced to career progression activities of women library professionals. This

study may help to take up a decision in the career advancement activities of women librarians in Kerala & Mahatma Gandhi universities. This study may also help to take up proper guidelines to adopt positive working atmosphere that ensures mutually benefits of subordinates & organizations keep good career advancement of women library professionals. An innovative professional has an eye on creativity. This study restricted to two universities only. There are 15 universities in Kerala. The researcher collected the data from two major Universities only.

V. REVIEW OF LITERATURE

Lijina in (2016) [3] examined the impact on mass media on the empowerment of women librarians. The questionnaire, interviews, and observation were used to collect data from 420 women library professionals working in various libraries of Kerala. Results showed that the good number of women librarians read 1 to 3 newspapers and 2 magazines regularly, while radio, television, & internet were the most used mass media. The media such as newspapers, magazines, TV & internet were much significant contribution towards the empowerment of women library professionals.

Uma (2016) [4] investigated the role of women library professionals in the digital era in Chennai. She investigated career profile & experience, computer literacy level, inhibiting factors faced on women librarianship, job satisfaction level of women library professionals in colleges in Chennai. She circulated 450 questionnaires for women library professionals in colleges in Chennai. This study found that women library professionals had very good computer exposure and work in the digital library. Women librarians migrated a traditional library to e-world. Chengbin (2013) [5] investigated and analyzed of career development of female librarians in college libraries. This study discussed that the occupational development of female librarians in college library through questionnaire method of data collection and carried out from four perspectives ie, traditional notations of gender culture, sex segregation occupation, gender stereotype. Suggested to eliminate the barriers for career development.

Swartz (2002) [6] explored the career advancement of women librarians in South African institutions of higher education. The study pointed out the low status of female librarians that have been noted in libraries in South Africa and elsewhere in the world. The aim of this study was to explore the perceptions of women librarians in certain tertiary institutions regarding the following points gender discrimination affect what extent on the career positioning of female librarians and obstacles impeded the career advancement of female librarian.

VI. METHODOLOGY

A survey is conducted to collect data from the women library professionals of Universities in Kerala. The two

universities namely University of Kerala and Mahatma Gandhi University are taken for the study. The questionnaire was administered to collect primary data. A survey among the women LIS professionals those who are working in department libraries & university central libraries. The questionnaire method of collection of data is found suitable for gathering data, particularly from professional respondents. About 73 permanent women

library professionals working in these Universities, 68 questionnaires were distributed among the respondent from the libraries, out of which 62 were returned.

VII. DATA ANALYSIS AND INTERPRETATION

Table I shows that 68 questionnaires distributed for women library professionals out of which 62 were returned.

TABLE I DISTRIBUTION OF RESPONDENTS BY UNIVERSITIES

Respondents	No. of questionnaire distributed	No. of questionnaire received
University of Kerala	43	40
MG University	25	22
Total	68	62

TABLE II RESPONDENTS DESIGNATION WISE

S. No.	Designation	Number	Percentage
1	Deputy Librarian	2	3
2	Assistant Librarian	17	28
3	Reference Assistant	11	18
4	Technical Assistant	22	35
5	Library Assistant	10	16

4	Enrich profession related discussions	58	94%

In the present scenario, social media is influencing factor of career progression activities in women library professionals. This is also helpful in research & learning. Table XII shows that 100% respondents used the social media for interaction with friends & 94% reveals social media enhanced the

profession related discussion .95% respondents need to obtain sharing images, videos, voice clips for professional development activities. Only 75% used to create career progression activities forum.

TABLE XIII INFLUENCING LEVEL OF FACTORS ON CAREER ADVANCEMENT

S. No.	Factors	Extremely influential	Very influential	Somewhat influential	Slightly influential	Not at all influential
1	Organizational factors	58(94%)	4(6%)	0	0	0
2	Professional factors	62(100)	0	0	0	0
3	Relation with colleagues	0	0	31(50%)	26(42%)	5(8%)
4	Educational	43(69%)	8(12%)	12(19%)	0	0
5	Social	7(11%)	13(21%)	5(8%)	21(34%)	16(26%)
6	Economical	3(5%)	8(13%)	18(29%)	26(42%)	7(11%)
7	Political	0	0	3(5%)	2(3%)	57(92%)
8	Health	45(72%)	0	0	14(23%)	3(5%)
9	Family	59 (95%)	0	3(5%)		
10	ICT's	62(100%)		0	0	0
11	Social media	58(94%)	4(6%)	0	0	0

Table XII shows the influencing factors wise analysis for career progression of women librarians. It is clear from the table that the organizational factors 94% extremely influential for career progression activities, 6% extremely influential, 100% respondents reveal professional factors is extremely influential for their career progression activities. 50% respondents point out relation with colleagues as somewhat influential, 42% & 8% point out slightly influence & not at all influential respectively. 69% of respondents reveal educational factors are extremely influential, 12% very influential & 19% somewhat influential for their career development activities. Social factors extremely influencing in below 11%, 21% very influential, 8% somewhat influential, 34% & 26% by slightly influential & not at all influential respectively. Economical factors 5% extremely influenced, 13% very influential, 29% somewhat influential, 42% slightly influential, 11% not at all influential for their career progression activities. Majority of respondent 91% reveals politics has no influence for career progression activities, majority 72% reveals health is extremely influential factors, 23% slightly influential only 3% not at all influential. The majority (95%) of respondents reveal family factors extremely influence the career progression activities, only 5% point out somewhat influential. 100% respondents reveal ICT is extremely influential for their career advancement activities. 94% opined social media as extremely influential and only 4% very influential for career progression activities.

TABLE XIV BARRIERS FACED CAREER ADVANCEMENT ACTIVITIES

S. No	Barriers	Respondents	Percentage
1	Insufficient ICT training	46	74
2	Lack of authorities support	52	84
3	Work-family conflict	23	3
4	Lack of personal career progression agenda	37	60
5	Lack of support from experienced colleagues	22	35
6	Gender discrimination	59	95

While the way of career progression activities the women librarians have to face many barriers. Table XIV revealed that majority (95%) of the respondents indicate gender discrimination as the major problems while facing career progression activities. The respondents also face obstacles like lack of authorities support (84%), insufficient ICT training (74%), lack of personal career progression agenda (84%), work-family conflict (37%), lack of support from experienced colleagues (35%).

VIII. FINDINGS OF THE STUDY

1. Most of the women library professionals i.e. 35% have the technical assistant in universities.
2. Majority (86%) of women librarians qualifying only MLISc Degree.
3. 100% of respondents have chosen this profession to innovate their social status.

4. 100% of women librarians are members of professional associations.
5. A majority (98%) of women librarians pointed out that the associations enhanced the achievement motivation.
6. Women librarians are actively taking part in various professional development activities, 27% respondents attended orientation courses, 35% attended refresher courses, 100% attended seminars/conferences, 100% attended the workshop and 97% attended ICT based training.
7. Women librarians have less actively participated in publishing work, 8% women librarians published either chapter in books, 13% published papers in journals and 21% in conference proceedings & only 5% published other types of literary work.
